2S Water

Sensors that allow real time water monitoring of 105 different contaminants.

Edmonton, AB	Founded in 2017	1—10 Employees
TRL 4	Event Goal:	- Strategic partner - Growth capital
Funding Round: Seed		

Did you know there are more than 1000 boil water advisories in Canada? Water monitoring is so antiquated that we generally know there is a problem when the population starts to show up in the hospital. 2S Water have a sensor for drinking water quality monitoring to ensure that water is safe and clean when it leaves the water treatment facility. We will monitor 105 different contaminants, including biological indicators, on a real time basis. We function without a skilled user, so that even the most underfunded facility can have world class monitoring. And because we sell our sensor as a service, we are part of the operational budget and can demonstrate savings greater than our cost, making the purchase decision easy. 2S Water is also developing industrial sensors, with a real time lithium sensor as our first offering, and more on the way. With a 2B North American market, and secondary industrial markets worth another 28B, we stand to make both a massive difference and an exponentially scalable company. We want to empower water treatment facilities and protect populations, here and across the world. Imagine a world where you can safely drink the water from the tap. That is the world 2S is building. You can help us build it.

Anthea Sargeaunt — CEO
asargeaunt@2swater.com

Anthea Sargeaunt is a 3X entrepreneur with more than 15 years experience. She has worked in a variety of industries including manufacturing and professional services. She has an MBA.

Anthony Nelson — Chairman
abnelson@2swater.com

Anthony Nelson is a 10X entrepreneur with 4 exits, including an IPO. He has been a CEO for 25 years, managing a group of companies in Alberta. Tony is a computer security expert and programmer.
